# Old Book Project

Project Name: OBOOKS

AGENDA

- 1.Introduction to the project

- 2.Problem statement and target audience

- 3.Opportunities and target market

- 4.Solution
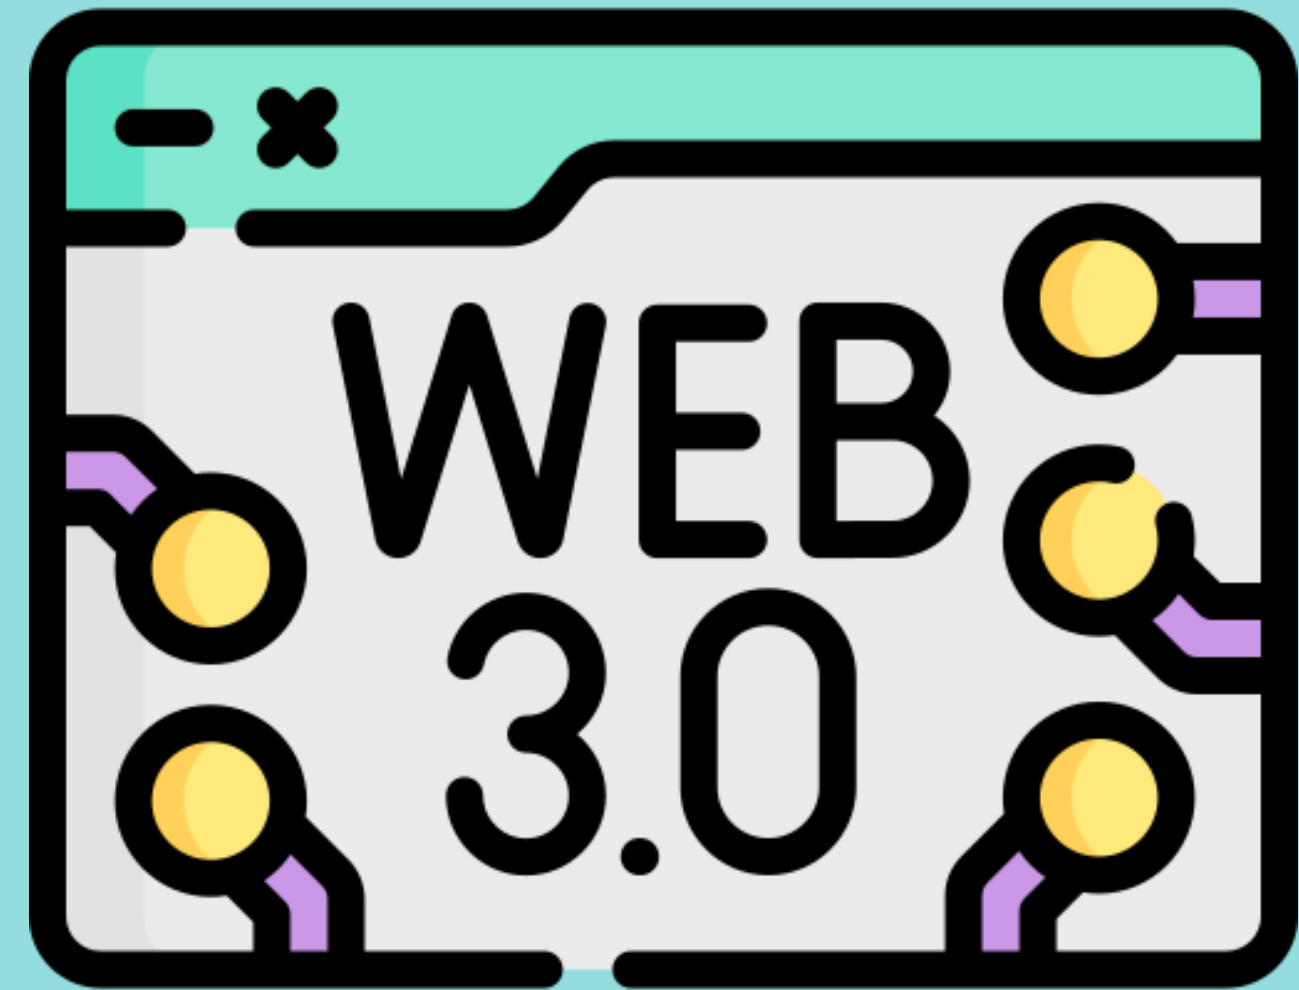

1.Introduction to the project

1.Introduction to the project

- Idea: Create a platform for buying and selling used books using Blockchain technology and the Solana electronic wallet. With the Blockchain platform and Solana wallet, users can create and manage Solana wallet accounts to facilitate transactions between buyers and sellers.

- At the same time, orders and payments will be recorded on the Blockchain, ensuring transparency and immutability of transactions.

1.Development direction

- **Building a community of book enthusiasts(Web3 Social):** Providing a forum, blog, or comment system for users to discuss books, give reviews, and share their experiences.

- **Market for buying and selling used books(Marketplace):** allows users to post information about the used books they want to sell, search for used books they want to buy. Provides search, filter, and suggestion features to help users easily find items.

- Operating mechanism: Users can interact and exchange information by linking their accounts through Solana wallet to facilitate trading, buying, and socializing on the website's community platform.

2.Problem statement and target audience

2.Raise the issue

- Unable to find a reliable source of goods.

- Difficulties in payment.

- Unable to guarantee finding suitable books as well as unable to assess the quality of the books.

2.Target

- Buyers and sellers facilitate convenient exchanges through trustworthy and transparent transactions using Solana wallets.

3.Opportunities and target market

3.Opportunities and market

- Opportunity: This is a project with potential for development. There is still a large number of buyers as well as collectors of old books that are no longer published on the market.

- Market: We build a small-scale community, developing over time, providing users with reliability when conducting transactions while considering evaluations from other users.

4.Solution

4.Solution

- Provide a reliable and convenient environment for buyers and sellers of used books, helping them solve common issues they encounter during the process of buying and selling used books.

- For used book buyers, our product helps them search and explore thousands of books from different genres and authors.

- Applying Blockchain technology helps make exchanges safe and transparent.
